Calgary and the Gold Fields

THE unprecedented interest that is being taken in the gold fields of the Yukon, and the thousands of enquiries that have been received by the business men of Calgary from those who intend to go into the gold country by way of Calgary in the spring of 1898, has created the necessity for having all desirable information laid before those interested, in the most concise manner possible, and it is with this object that this booklet is published.

The City of Calgary.

(THE STARTING POINT)

Calgary might fairly be said to be "on the map." The city is situated in the foot-hills of the Rocky Mountains and is the principal railway centre in Alberta. It is on the main-line of the Canadian Pacific Railway, and trains pass through both east and west every day. There is also a tri-weekly train service to Edmonton in the north and to the south. The business houses of Calgary are reliable and fully up to date. You can get outfitted in Calgary more cheaply than you can bring goods into the country and all trouble, as regards freight and duty, is avoided; also delay through having to wait for goods to arrive. Freight trains are tedious, and time is money when you are on the road to the gold country

where the season is short. Besides being a railway centre, Calgary is in the very heart of the ranching country, and travellers can get here whatever they may require in the way of pack horses. The price now (Feb. 1898) for pack horses varies from \$15.00 to \$45.00 each. A good pack horse should carry 200 lbs., with ease, or draw 600 lbs. on a flat sled. Groceries, clothing, hardware, saddlery, tents and sleeping bags can be had here in any quantities.

The Routes.

From Calgary to Dawson City by way of the Peace River and Pelly River it is about 1562 miles.

From Calgary to Dawson City by way of the McKenzie River, Porcupine River and Yukon River it is

4 CALGARY AND THE GOLD FIELDS

about 2616 miles and nearly all down stream. This is a cheap route, a safe route and an easy route.

From Calgary to Dawson City by way of the Athabasca River, Liard River and Pelly River it is about 3245 miles.

The great thing in favor of these several routes is the fact, that as soon as you get a short distance beyond Edmonton you are in a gold bearing country and it is expected that some rich strikes will be made on the Peace, the Peel, the Liard and the Pelly before the end of the year. All the streams flowing through the rich Omenica country drain into the Peace and ~~carry~~ carry gold. Large sums have been washed out by the few who have already prospected some of the placers of that great district.

Tables of Distances.

Calgary to the Yukon via the Mc- kenzie river route.

	MILES
Calgary to Edmonton.....	About 192
Edmonton-to-Athabasca Landing.....	" 90
Athabasca Landing to Grand Rapids....	" 167
